RESIDENTIAL HONORABLE MENTION - UNDER 3500

Remodeling a water front 1940's fishing shack called for simple materials and great sensitivity to the environment.

Pulling colors from the Texas Gulf Coast birds; grays, whites and beiges to hopefully not disturb the blue waterfront view. For a very small space a tight but functional floor plan was key. The remodel involved first cleaning up the color palette then moving a door, creating an entry, adding a door for guest bathroom access, using old porch posts for bed frames and an old barn door that was white washed for character conformed the space.

The remodel included new kitchen cabinets, new appliances, plumbing and hardware, plantation shutters and painting the Saltillo tile floor with epoxy. All materials are natural using linen, cotton, leather, sheepskin, concrete and steel.

For added character the owner/designer pulls a thread of her ranch style life and horses throughout the house.
